

Instructions

Review the scenario below and complete the tasks as outlined. Once the task is completed, present your screen to the Trainer and you will receive the next scenario.

Scenario

You work in a medical office and notice that one of your colleagues has a custom view that you would like too. Follow the “How to Personalize Your View” document to create the view below.

The screenshot displays the ClinicalViewer interface with five main sections:

- Medications:** A table with columns: Dispensed Date, Generic Name, Brand Name, Strength. It lists various medications like ERYTHROMYCIN, ACETYL SALICYLIC ACID, etc.
- Visits/Encounters and Summary Reports:** A table with columns: Date, Type, Summary Rep..., Organization. It shows dates from 15 Aug 2019 to 15 Apr 2016 with types like ED, Ambulatory, and Inpatient.
- Documents/Notes:** A table with columns: Document Date/Time, Document, Description. It lists documents such as Physician Consult, Triage Note, and Discharge Summary.
- Diagnostic Imaging:** A section with columns: Procedure, Date/Time, Report, Image, Procedure Description. It currently shows "No results available for the selected time interval."
- Community:** A table with columns: Referral Start Date, Referral Type, Reason for Referral. It shows a referral on 18 Jan 2017 for CVA.

Task	Answer / Initials
1. Create a custom view	
2. Select your patient to display your custom view with patient details
