

We want to hear from you!

Seeking health care provider feedback for ONE Health project

What is ONE Health?

ONE Health aims to simplify and harmonize how health care providers discover, register for and access digital health services.

The project is focused on delivering access to multiple applications through a single place, enabling providers to access patient health records and related services.

What is the opportunity?

As part of the ONE Health project, we are seeking sole physicians, community pharmacists and lab technicians to share their experiences with accessing patient health information and using digital health products, as well as to test the ONE Health product currently under development. We want to learn about your needs and expectations for accessing patient health records in order to build a high-value service.

Please note that all participants will be required to sign a privacy and confidentiality agreement prior to participating in this project.

What is the time commitment?

One-time 45-60 minute interview, **or** monthly one-hour sessions for 12 months.

Dates and times are flexible based on your availability.

Format and location

One-on-one sessions will be held **virtually** through video conference.

How to apply

[Complete a short application form](#) to register your interest.
