

ConnectingGTA Goes Provincial

New Delivery Partner; New Name

As of July 4, 2016 ConnectingGTA became ConnectingOntario Greater Toronto Area.

“The re-branding of ConnectingGTA is an exciting marker – one that announces that we truly do have a provincial electronic health record that is making significant improvements to patient care in Ontario.”

Malcolm Moffat

Executive Vice President, Sunnybrook Health Sciences Centre, Toronto

Chair, ConnectingGTA Steering Committee

Sunnybrook Health Sciences Centre recently became the new delivery partner leading the Clinical Data Repository Viewing Project for new sites in the Greater Toronto Area.

Sunnybrook has started engagement with more than 30 sites in multiple healthcare sectors to discuss plans for accessing the ConnectingOntario Viewer. Sunnybrook is working with eHealth Ontario and Central Region Local Health Integration Networks to identify additional Viewing sites that would further increase adoption.

Sunnybrook is also working jointly with eHealth Ontario to provide Viewing implementation support to the sites currently completing data population.

ConnectingGTA Re-Branded

With the significant progress made by all regions and the focus on province-wide connections, regions are being re-branded under the new ConnectingOntario brand identity to better represent the end goal of a single electronic health record.

While all new materials will carry the ConnectingOntario branding, readers may see the old brand on existing materials until the content needs to be updated.

Due to differing needs and stakeholders, regions are rolling out the re-branding at different times.

ConnectingOntario Northern and Eastern Region

4 CCACs are contributing data to the provincial CDR

2 Champlain hospitals are in the Conformance Testing Phase

63 additional hospitals are engaged to contribute
